

Fundamental Rights Impact Assessment

Regulation: EU 2024/1689 Art. 27 **Generated:** 2026-04-22T12:27:51.702808+00:00 **Status:** draft

Deployer

- **Organisation:** Nordlicht HR GmbH
- **Contact:** DPO, dpo@nordlicht.example
- **Role:** deployer

Trigger

- **Category:** other_high_risk
- **Reference:** Other Annex III high-risk deployment with deployer obligations

1. Process description (Art. 27(1)(a))

- **Agent:** Role-match CV Screener (external/role-match-cv-screener v2, hr)
- **Agent description:** Ranks incoming CVs against a job specification, producing a match score and explanatory snippets. Used to triage large applicant pools before human recruiters review shortlisted candidates.
- **Deployer process summary:** Recruiters bulk-upload CV PDFs against a job posting. The system returns a ranked list; recruiters shortlist manually from the top 30%. No candidate is rejected without human review.

2. Duration and frequency (Art. 27(1)(b))

- **Intended duration:** [DEPLOYER: calendar duration or 'ongoing']
- **Frequency:** Daily during active hiring cycles
- **Estimated volume per month:** ~800 candidates across 8 open roles

3. Affected persons (Art. 27(1)(c))

Primary categories:

- Job applicants in the DACH region

Vulnerable groups considered:

- Applicants with non-native German language CVs
- Applicants with career gaps (parental leave, caregiving, illness)
- Applicants over 50

Special categories of data (GDPR Art. 9): [DEPLOYER: GDPR Art. 9 data processed, if any]

4. Specific risks of harm (Art. 27(1)(d))

- **Platform risk class:** high

Identified potential harms:

- Discriminatory ranking on age, gender, ethnicity correlates
- Reinforcement of historical hiring bias in the training data
- Loss of qualified candidates who do not fit the model's expected CV format
- **Severity assessment:** [DEPLOYER: qualitative severity scoring per identified harm]
- **Likelihood assessment:** [DEPLOYER: qualitative likelihood scoring per identified harm]

5. Human oversight (Art. 27(1)(e))

Platform-provided measures:

- Mandatory approval gate: tasks enter 'awaiting_approval' before execution (Art. 14)
- Immutable event log per execution (Art. 12)
- Ephemeral compute: fresh VM per task, destroyed on completion (Art. 15)
- Signed capability card identifying model, data access, and side effects (Art. 13)
- Machine-readable Art. 50 provenance headers on every output

Deployer-provided measures:

- Mandatory human review of top 30% of ranked candidates
- Quarterly shortlist audit comparing model ranking to final hires by demographic
- Candidate right to request human-only review on demand
- **Instructions for Use (IFU) version:** capability-card@v2

6. Governance and mitigation (Art. 27(1)(f))

Internal governance:

- Bi-weekly review with works council representative
- Quarterly bias audit presented to management
- Stop-deployment authority: DPO
- **Complaint mechanism:** Candidates can request full human review via email; 10-day response.
- **Authority reporting (Art. 73):** [DEPLOYER: process for reporting serious incidents to the national MSA (Art. 73)]
- **DPIA reference (Art. 27(4)):** DPIA-HIRE-2026-04
